Client: Pentagon Freight
Value: N/A
Completion: 2014

Technicus Consulting was appointed to undertake an appraisal of eroded and collapsed quays to the site and advise on risks to health and safety and to the business.

The inspection involved preparation of a risk assessment to enter the fenced-off areas which had suffered collapse and subsidence due to erosion following failure of the quay heading. A safe method of working had to be determined in order to record deterioration.

The report advised upon the risks and development of action plans.
